

MakeShift 21: Ed Banke's Most Creative Winning Entry

First things first – dump the cookies – put the cellphone and flashlight in the zip-lock bag and stuff it in your shirt or under your belt. With the Leatherman, cut loose the air bag. Leave the car with the zip-lock, air bag, and umbrella, and the coat if you can carry it. Once outside the car, open the umbrella under water. Stay upstream of the umbrella and you can use it to steer yourself to shore. Once ashore, use your cellphone to call for help. Put the flashlight inside the airbag and turn it on and off at intervals. The large glow will help searchers in finding you. If you saved the cookies anyhow, now would be a good time to partake of a few to keep your energy up.
