1. Wire up the 555 chip and power pins of the 4017 chip.

2. Turn 10 outputs into 6 signals, using 4 diode OR gates.
3. Make 6 low-pass transistor LED drivers.

Copy outlined part five times, with
Signal #2, LED #2
Signal #3, LED #3
Signal #4, LED #4
Signal #5, LED #5
Signal #6, LED #6
