

Crochet Cuff

Craft: PATTERN
craftzine.com PODCAST

Create!

This treble square cuff is a quick, fun, and functional crochet project that you can probably complete in about an hour or less. The square pattern is repeated three times and then joined together by a second yarn color, and because of the way I have designed the cuff, each joined side looks identical. Happy crocheting!

Prepare

You will need

- two colors of yarn of similar weight (one for the border, one for the inside)
- F hook

Abbreviations

- ch - chain
- sc - single crochet
- sl st - slip stitch
- tr - treble crochet
- inner loop = front loop
- outer loop = back loop

Create!

Using your main color, make 3 squares as follows:

ch 8 and join with a sl st.
ch 4, 3tr into the ring,
*ch 5, 4 tr into ring,

Repeat from * twice more;

ch 5, join with a sl st to 4th of the first ch 4. Finish off.

Repeat above twice to make 2 more squares.

Now to join the three squares together using your secondary color:

1. Place wrong sides together of two squares (right sides facing outwards). Working into the inner loop of the square closest to you and the outer loop of the square furthest from you, sc along one side.
2. When you reach the top, working to the left, sc into the inner loop across (you're now only working into one square). Stop before you hit the open corner. Join.
3. Repeat step 1.
4. When you reach the bottom row, sc into each inner loop across of the middle square, always working from right to left when it is facing you. Join.

This should frame one square.

5. Without finishing off, sc into each inner loop across the bottom of the next square.

6. Repeat steps 1 and 2, joining together with the square to form the cuff and NOT stopping when you hit the open square. Proceed to sc into the loops and join with square. Finish off.
7. Join the border color at the top right corner of the square not completed. Sc into each inner loop along top row. Join this square with the adjacent square. Finish off.
8. Join the border color at the bottom corner and repeat step 4. Finish off.
